Typography

Base Styles

This is a paragraph. Paragraphs are preset with a font size, line height and spacing to match the overall vertical rhythm. To show what a paragraph looks like this needs a little more content—so, did you know that there are storms occurring on **Jupiter** that are larger than the *Earth*? Pretty cool

A slightly-larger-than-normal block of text, useful for decks, blurbs, or other descriptive text.

Those people who think they know everything are a great annoyance to those of us who do.
— *Isaac Asimov*

Why is it so important to dream?

So, once we've made the plant, how do we go out? Hope you have something more elegant in mind than shooting me in the head? A kick. What's a kick? This, Ariadne, would be a kick.

What is the most resilient parasite? Bacteria? A virus? An intestinal worm? An idea. Resilient... highly contagious. Once an idea has taken hold of the brain it's almost impossible to eradicate. An idea that is fully formed - fully understood - that sticks; right in there somewhere.

Why is it so important to dream?
